

## Infant Program

Baby Bay - 6 weeks - 12 months

Our infant program was created to work with your child's individual needs, adapting to his or her physical, cognitive, and psychosocial stages of development. At Capital Kids, our caregivers provide an environment that will help your child build a sense of security and will lay a foundation for the development of confidence and trust. We will work closely with you on a daily basis to ensure we are meeting your infant's evolving needs through individualized schedules and loving, attentive care. The infant caregivers provide a daily variety of experiences and opportunities, such as tummy time, swinging, crawling, exploring the play area, Exersaucer time, and lots of cuddles. Our play areas provide equipment and toys that support both gross and fine motor development, as well as stimulate sensory and perceptual acuteness.

All children in our infant program will receive daily reports to keep their parents informed as much as possible. This daily report includes a brief overview of your child's day as well as their eating, diapering, and sleeping schedule. Teachers also use these reports to note when your child is running low on supplies and communicate any concerns or comments.
