

Toddler Program

Tiny Tots - Young Toddlers

Munchkin Movers –

Older Toddlers & Young 2's

Capital Kids toddler curriculum is designed to meet the needs of your individual child while preparing them for preschool. Your toddler will be encouraged to build his or her independence while in a safe and nurturing environment. Your toddler's natural curiosity about the world around provides the foundation for our program. Our toddler classes follow a daily schedule that provides opportunities for literacy and math development, nature studies, music and movement, art, sensory activities, and motor skills development. Lesson plans are posted on a weekly basis and provide information regarding classroom activities.

The Tiny Tots classroom focuses on developing your child's independence, building vocabulary, cognitive development, and gross motor skills. Our teachers begin to introduce literacy and math concepts through play, story time, and art.

The Munchkin Movers classroom is another step up in curriculum. Here your child will begin learning about letters and numbers and what these symbols mean as well as shapes, colors, and nature studies. We continue to build your child's confidence and independence through self help skills and open ended play.
